OUTDOOR COURT SURFACE

360 LYNX SERIES

Built to perform and provide a superior surface for outdoor and indoor physical play. Lynx series court tiles are built with traction control and fast action drainage specifications to allow your court to handle the outdoor elements. UV stabilizers are built into the tile to keep it looking sharp for the life of the court. Lynx series courts have smart engineered locking clips to provide a superior locking component. Fast and easy installation process for any project. Lynx series tiles are used in residential and commercial applications around the world to enhance and create a dynamic playing surface for everyone to enjoy.

DYNAMIC VISUALS

Build your dream court with multiple colour variations. Choose your court system that complements your style and court desires. Transform your space into a unique or standard court system.

SIMPLE MAINTENANCE

Standard Asphalt or Concrete courts are prone to cracking and constant up keep. 360 Court tiles require minimal maintenance and do not need expensive cleaning solutions.

SAFETY

Shock and anti joint fatigue protection is built into the tile to provide a safe surface for sport play. 360 tiles are engineered with expansion joints that help relieve stress on the player and tile.

ELEMENTS

Lynx Series tiles are designed to handle North America's vast climate system. From the extreme heat to the frigid cold from the North. Lynx series tiles create a solid all weather system that stands up to mother nature.

INSTALLATION

360 Courts is a versatile interlocking court system that is simple to install by any residential or commercial installer. Purchasing a 360 Court is quick and easy DIY process with fast ordering and shipping. Step by step instructions make building your court a fun and easy project.
